

Record-Keeping & Evidence Gaps (RKEG) – Detailed Report

Organisation: Organisation name not provided

Review period: 01 Mar 2024 to 20 Apr 2024

Report prepared as at: 09 Apr 2026

Important note

This report highlights potential risk signals and process issues based on the data provided. It does not constitute legal, accounting, or industrial relations advice.

1. Executive Summary

This Record-Keeping & Evidence Gaps (RKEG) report focuses solely on evidential risk indicators identified from the supplied payroll and HR data. The review assesses how complete, consistent and traceable payroll-related records appear for audit and dispute purposes. It does **not** determine whether payroll outcomes are correct or incorrect under applicable legislation, awards or agreements.

Across the dataset provided, the automated checks identified:

- **High:** 3
- **Medium:** 1
- **Low:** 0

A detailed breakdown by severity is provided in the **Findings Overview** section.

2. Data Sources

This review was generated from the following analysis outputs within the project `outputs/` directory:

- `rkeg_summary_by_severity.csv`
- `rkeg_findings.csv`
- `executive\executive_summary.md`
- `executive\executive_summary.json`
- `crc_coverage_insight.md`

These outputs were produced by rule-based checks over payroll and HR CSV extracts supplied by the organisation for the review period.

3. Scope & Methodology

Modules included in this engagement:

- Record-Keeping & Evidence Gaps (RKEG)
-

Record-Keeping & Evidence Gaps (RKEG) – Scope & Methodology

Scope

The Record-Keeping & Evidence Gaps (RKEG) review assesses whether payroll-related records are sufficiently complete, consistent and traceable to support the organisation's ability to evidence payroll decisions if reviewed by auditors or regulators.

RKEG focuses on evidential strength, not on determining whether payroll outcomes are correct or incorrect. Findings highlight where records may be incomplete, inconsistent, or difficult to substantiate if challenged.

This review is intended to support risk-aware payroll operations by identifying evidence weaknesses that can increase audit effort, increase dispute risk, or reduce the organisation's ability to confidently explain pay decisions.

Data reviewed

- employee master data (where supplied)
- pay event / payroll transaction extracts (where supplied)
- termination and employment status fields where included in the engagement data pack

Checks performed

- completeness checks for key employee master fields required for traceability and defensibility
- identification of orphan or untraceable pay events (for example, pay events with missing or inconsistent identifiers)
- consistency checks across employee status and payroll activity where possible
- identification of gaps that may require manual reconstruction to support an audit trail

Out of scope

This review does not:

- calculate entitlements, underpayments or overpayments

- interpret awards, enterprise agreements, or employment contracts
- provide legal, accounting, or industrial relations advice
- assert contraventions of legislation or confirm non-compliance.

RKEG findings should be interpreted as evidential risk indicators. Addressing them improves defensibility and reduces audit effort, but does not necessarily imply a payroll outcome is incorrect.

4. Findings Overview

As part of this review, a Record-Keeping & Evidence Gaps (RKEG) assessment was performed to evaluate whether payroll-related records are sufficiently complete, consistent and traceable to support payroll decisions if subject to audit or regulatory review.

The RKEG assessment focuses on evidential strength only. It does not determine whether payroll outcomes are correct or incorrect, and does not interpret awards, enterprise agreements or employment contracts.

The table below summarises the number of record-keeping and evidence gaps identified by severity. Counts reflect **evidential risk** only and do not represent confirmed non-compliance or quantified financial exposure.

Severity	Count	Description
High	3	Absence or weakness of core evidence or entitlement configuration that would materially impair the organisation's ability to evidence payroll decisions if reviewed by auditors or regulators.
Medium	1	Evidence is incomplete, inconsistent or fragile. Decisions may still be defensible but require greater reliance on manual reconstruction, judgement, or explanation.
Low	0	Record-keeping or data quality weaknesses that are unlikely to be challenged in isolation but should be improved over time to support efficient and reliable payroll operations.

5. Detailed Findings

This section sets out detailed findings for **Record-Keeping & Evidence Gaps (RKEG)** only. Findings highlight where payroll-related records may be incomplete, inconsistent or difficult to substantiate if reviewed by auditors, regulators or in the context of a dispute. They do **not** confirm incorrect pay outcomes.

Each finding below follows a consistent **Finding → Evidence → Impact / Risk → Recommended Action** pattern.

Finding 1: RKEG-PAY-010

Severity: HIGH

Finding Pay events were identified that fall outside the employee's recorded employment period.

Evidence

- Employee ID: E002
- As at: 2024-04-20
- Evidence reference: `{"sources": ["pay_events.csv", "employees.csv", "terminations.csv"], "primary_keys": {"employee_id": "E002"}, "values": {"pay_date": "2024-04-20", "start_date": "2018-06-01", "termination_date": "2024-03-01", "days_after_termination": 50}, "thresholds": {"allowed_days_after_term": 14, "high_severity_cutoff_days": 30}, "explanation": "Pay event occurred significantly after the recorded termination date, indicating a likely inconsistency between employment period and payroll activity."}`
- Finding ID: dd592d106757
- Suggested next action (from data): Reconcile pay events against employment start and termination dates and investigate any payments recorded outside valid employment periods.

Impact / Risk Increased evidential and audit risk in relation to payroll records. Weak or incomplete records can increase the effort required to explain pay decisions and may reduce the organisation's ability to respond confidently if challenged.

Recommended Action

- Validate this finding against underlying payroll, HR and source system records.
- Strengthen documentation and evidence capture for the affected record types (for example, by ensuring key identifiers and dates are consistently populated).

- Where systemic patterns are identified, update data capture processes, templates and training to reduce recurrence.

Finding 2: RKEG-TERM-001

Severity: HIGH

Finding One or more terminated employees appear to have received final pay outside the configured statutory timeframe.

Evidence

- Employee ID: E002
- As at: 2024-03-01
- Evidence reference: `{"sources": ["terminations.csv", "pay_events.csv"], "primary_keys": {"employee_id": "E002", "termination_date": "2024-03-01"}, "values": {"termination_date": "2024-03-01", "derived_final_pay_date": "2024-04-20", "days_after_termination": 50}, "thresholds": {"max_days_after_termination": 7}, "explanation": "Latest pay event on or after termination date exceeds the configured final pay timing threshold."}`
- Finding ID: 48bcf89ca83b
- Suggested next action (from data): Review termination processing workflows and ensure final pay is calculated and processed within the required statutory timeframe.

Impact / Risk Increased evidential and audit risk in relation to payroll records. Weak or incomplete records can increase the effort required to explain pay decisions and may reduce the organisation's ability to respond confidently if challenged.

Recommended Action

- Validate this finding against underlying payroll, HR and source system records.
- Strengthen documentation and evidence capture for the affected record types (for example, by ensuring key identifiers and dates are consistently populated).
- Where systemic patterns are identified, update data capture processes, templates and training to reduce recurrence.

Finding 3: RKEG-TERM-001

Severity: HIGH

Finding One or more terminated employees appear to have received final pay outside the configured statutory timeframe.

Evidence

- Employee ID: E005
- As at: 2024-03-01
- Evidence reference: {"sources": ["terminations.csv", "pay_events.csv"], "primary_keys": {"employee_id": "E005", "termination_date": "2024-03-01"}, "values": {"termination_date": "2024-03-01", "derived_final_pay_date": "2024-03-10", "days_after_termination": 9}, "thresholds": {"max_days_after_termination": 7}, "explanation": "Latest pay event on or after termination date exceeds the configured final pay timing threshold."}
- Finding ID: 34e1bc417782
- Suggested next action (from data): Review termination processing workflows and ensure final pay is calculated and processed within the required statutory timeframe.

Impact / Risk Increased evidential and audit risk in relation to payroll records. Weak or incomplete records can increase the effort required to explain pay decisions and may reduce the organisation's ability to respond confidently if challenged.

Recommended Action

- Validate this finding against underlying payroll, HR and source system records.
- Strengthen documentation and evidence capture for the affected record types (for example, by ensuring key identifiers and dates are consistently populated).
- Where systemic patterns are identified, update data capture processes, templates and training to reduce recurrence.

Finding 4: RKEG-GOV-001

Severity: MEDIUM

Finding No structured override or exception log was provided for manual payroll adjustments.

Evidence

- Evidence reference: {"sources": ["pay_overrides.csv"], "primary_keys": {}, "values": {}, "explanation": "No structured pay_overrides dataset was provided, or the dataset was empty."}
- Finding ID: 6d64e12c4c87
- Suggested next action (from data): Introduce a basic override register or system-based workflow to record all manual payroll changes, including who made the change, when, and for what reason.

Impact / Risk Increased evidential and audit risk in relation to payroll records. Weak or incomplete records can increase the effort required to explain pay decisions and may reduce the organisation's ability to respond confidently if challenged.

Recommended Action

- Validate this finding against underlying payroll, HR and source system records.
 - Strengthen documentation and evidence capture for the affected record types (for example, by ensuring key identifiers and dates are consistently populated).
 - Where systemic patterns are identified, update data capture processes, templates and training to reduce recurrence.
-

6. Limitations & Assumptions

This review is subject to the following limitations:

- Calculations assume the underlying pay rates, loadings and multipliers are correct in the source systems.
 - Award and enterprise agreement interpretation is not performed by this tool.
 - Holiday calendars, leave rules and accrual settings are assumed to reflect the organisation's intended configuration.
 - Data quality issues (missing records, duplicates, inconsistent identifiers) may affect the completeness and accuracy of the results.
-

7. Recommended Next Steps

1. Validate the highest-severity findings first.
 2. Review the most affected modules and confirm whether findings reflect genuine control issues or data limitations.
 3. Address structural data gaps that weaken evidentiary confidence.
 4. Confirm root causes before remediation.
 5. Re-run the review after corrective action to confirm that risk indicators have reduced.
-

8. Appendices

Appendix A – Rule Definitions

This review used a set of automated rules to flag evidential and process risk indicators.

Record-Keeping & Evidence Gaps (RKEG)

- Missing employee master data fields
 - Orphan pay events and traceability gaps
 - Inconsistent employment status records
 - Missing or inconsistent termination attributes
-

Appendix B – Machine-readable outputs

Complete machine-readable outputs are available in the generated CSV and summary files for the modules included in this engagement.

These files provide row-level detail suitable for operational review, sampling, remediation planning, or incorporation into a broader audit work program.
